

Features

- Purity : 99.99%
- Physical state : Gas (liquefied gas)
- Appearance : Compressed liquefied gas in high-pressure gas cylinder
- Boiling point : $-129\text{ }^\circ\text{C}$
- Melting point : $-208.5\text{ }^\circ\text{C}$
- Vapor pressure : 4453 kPa (233 K)

Applications

- Specialty gas as an agent for cleaning for dry etching in semiconductor and LCD industries

Customers

- Mitsui NF_3 has been widely used among global leading semiconductor companies and LCD companies for decades
